

A new name for the most reliable
thermal oxidizers you can buy:

NESTEC

...and a new standard in industrial products for environmental solutions.

If you're responsible for your ethanol plant's air pollution control, there's a new name with a lot of proven experience you need to know. **NESTEC** is a new company made up of employees with decades of experience in the design, manufacture and servicing of advanced technology thermal oxidizers.

NESTEC delivers uncompromising levels of performance with low utility consumption systems...making us the value leader, as well as the reliability leader. Our unique standardized designs simplify maintenance and help ensure highly consistent quality.

NESTEC also delivers the most comprehensive service capability in the business, including start-up and training, equipment inspection and installation, total maintenance programs, large spare parts inventories, and more...all available nationwide 24/7, 365 days a year.

Let **NESTEC** provide the equipment, service and aftermarket solutions for all your VOC and HAP control system needs.
